PROFESSIONAL SUMMARY

Full-stack Software Engineer with hands-on experience building web applications, data pipelines, and AI-integrated tools. Proven ability to contribute across the stack, from React frontends and REST APIs to data processing and ML workflows. Thrives in solving complex technical problems and contributing to high-performance systems that support modern infrastructure and intelligent applications.

EDUCATION

Albany State University	Albany, GA
<i>Bachelor of Science in Computer Science</i>	May 2025

EXPERIENCE

IT Academy Instructor	July 2025 – April 2026
<i>The net. America Corporation – Turner Job Corps Center</i>	Albany, GA

- Delivered instruction in data analytics, networking, and cybersecurity to 28 students while mentoring 23 additional participants.
- Implemented performance tracking that achieved a 96% module completion rate (27 of 28 students) within the cohort.
- Designed coding exercises and interactive learning modules covering Python, web technologies, and application development.

Co-Director of Technology	May 2025 – December 2025
<i>Mandate Democracy</i>	Fairfax, VA

- Directed technical development spanning data authentication systems, software workflows, and digital infrastructure design.
- Coordinated technical teams to align system development with data integrity, performance, and scalability.

Lead Annotator – AI & Computer Vision	May 2025 – November 2025
<i>GotGame</i>	Miami, FL

- Prepared and validated structured datasets for machine learning models supporting AI-powered application development.
- Implemented quality control processes to ensure accuracy and reliability of data used in AI systems.

Data Analyst (ASU Intern)	January 2025 – April 2025
<i>Marine Corps Logistics Base</i>	Albany, GA

- Analyzed a dataset of over 1.8 million cells, identifying approximately 243,000 null or non-actionable entries and surfacing data quality issues affecting system efficiency and storage utilization.
- Supported development of dashboards and reporting tools used in real-world operational environments.

Data Analysis and Software Developer	May 2024 – December 2025
<i>Parker Dewey (Multiple Clients)</i>	Hybrid

- Completed 30+ micro-internships delivering software development, data analysis, and security strategy work across industries including tech, finance, and aviation.
- Built client websites, designed a DevSecOps pipeline integration plan for a manufacturing client, and produced data-driven strategy deliverables for United Airlines, Levi Strauss & Co, and Raymond James.
- Collaborated with cross-functional teams to design scalable solutions and improve system performance.

PROJECTS

SPASA – AI-Powered Space Exploration Platform

React • JavaScript • HTML • CSS • NASA APIs • REST APIs • Git • Vercel

July 2026

- Developed an interactive web application that enables users to explore NASA imagery and space-related content through API integration and intelligent search capabilities.
- Built responsive React components, dynamic routing, and reusable UI architecture to deliver a modern user experience.
- Integrated NASA REST APIs to retrieve and display real-time space imagery, metadata, and scientific information.
- Implementing features including favorites, advanced search, responsive layouts, and AI-assisted recommendations.
- Live Demo: <https://spasa-one.vercel.app/>

React Library Web Application

React • JavaScript • HTML • CSS • React Router • Vercel

June 2026

- Built a responsive bookstore web application using React and reusable component architecture.
- Implemented client-side routing with React Router and built a shopping cart with dynamic quantity updates and pricing.
- Deployed on Vercel with continuous deployment configured through GitHub.
- Live Demo: <https://library-react-ashy.vercel.app/>

Personal Developer Portfolio

HTML • CSS • JavaScript • Responsive Design • GitHub Pages/Vercel

May 2026

- Designed and developed a responsive portfolio website highlighting software engineering projects, technical skills, and professional experience.
- Built reusable UI components and interactive features using HTML, CSS, and JavaScript while emphasizing accessibility and responsive design.
- Implemented modern web design principles, custom styling, animations, and project showcases to create an engaging user experience.
- Continuously maintain and expand the portfolio as new projects and technical skills are developed.

CERTIFICATIONS

- IBM Data and AI Professional Specialization
- IBM Cybersecurity Fundamentals
- CompTIA Security+ (In Progress, 2026)

SKILLS

- Languages: JavaScript (ES6+), Python, HTML5, CSS3, SQL
- Frameworks and Libraries: React, REST APIs
- Tools and Platforms: Git, GitHub, Docker, CI/CD, Vercel, Linux
- Domains: Full-Stack Development, Machine Learning Workflows, Data Processing, Agile Development, Debugging and Testing
